#### **DETAILED ACTION**

#### Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 4-6, 9, 14, 23, 24, 26, 30, 38, 39, 41, and 45 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

Referring to claims 4, 9, 14, 23, 26, 30, 38, 41, and 45, which represent the numerical surrogate markers embodiment of the invention, it is not clear where the limitation "the percent of individual patient response multiplied by a response factor" is enabled by the equation in the specification. In other words, in the numerical surrogate markers equation on page 6 of the Applicant's specification, it is unclear what term in the equation represents the "percent of individual patient response", and what term in the equation represents the "response factor".

Claims 5, 6, 24, and 39 depend from claims 4, 23, and 38 and therefore incorporate the same deficiencies.

Art Unit: 2125

### Double Patenting

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. Claims 1-50 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-15 of McMichael U.S. Patent No. 6,267,116. The claims of McMichael are directed to a method of calculating a revised dose of a drug for a patient, whereas the claims of the present application are directed to a method of calculating a revised dose of an anticoagulant, such as Coumadin® or warfarin. The method steps for both

Art Unit: 2125

sets of claims is the same, the only difference being that the claims of the present application specifically recite that the drug is an anticoagulant, such as Coumadin® or warfarin. It would have been obvious to one having ordinary skill in the art at the time the invention was made to use an anticoagulant, such as Coumadin® or warfarin, in the method of McMichael. It would have been obvious to use any type of drug in the method of McMichael as long as the effect of the drug in the patient were capable of being measured using surrogate markers. It is well known that the effects of anticoagulants in a patient can be detected by measuring levels of surrogate markers in the patient's blood. Thus, there would have been a reasonable expectation of success that the use of anticoagulants, such as Coumadin® or warfarin, could be incorporated into the method of McMichael.

## Claim Objections

5. Claims 5 and 18 objected to because of the following informalities: the limitation "D = DDNM - PDNM" should be changed to "D = DANM - PANM". Appropriate correction is required.

#### Conclusion

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ryan A. Jarrett whose telephone number is (703) 308-4739. The examiner can normally be reached on 10:00-6:30 M-F.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Leo Picard can be reached on (703) 308-0538. The fax
